ABOUT US

We are a young dynamic electrical and automation company.

Sustainability, quality and competence are our top priorities.

Over 25 years' experience, Operational in Germany since 2022.

Now with a new service branch in the Netherlands.

We provide services in control-panel production, electrical installations and inspection.

Our objective is to grow into a renowned automation company with all possible services, including PLC/HMI programming, Project Planning and Robotics.

Our control panel construction projects are carefully and safely produced/inspected according to the Dutch and European NEN- EN Standards.

For more information, you are welcome for an introductory meeting at our branch in Stadskanaal.
